

KASHMIR
EDUCATION INITIATIVE

Where Potential Meets Opportunity

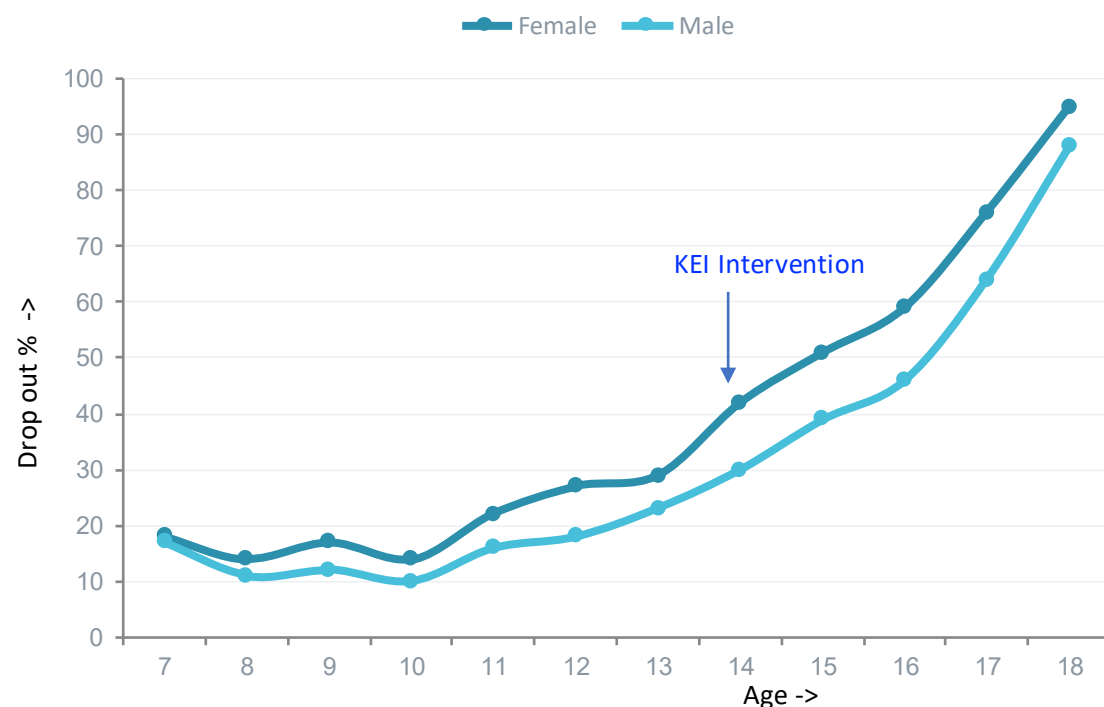

Strategy & Overview

July 2026

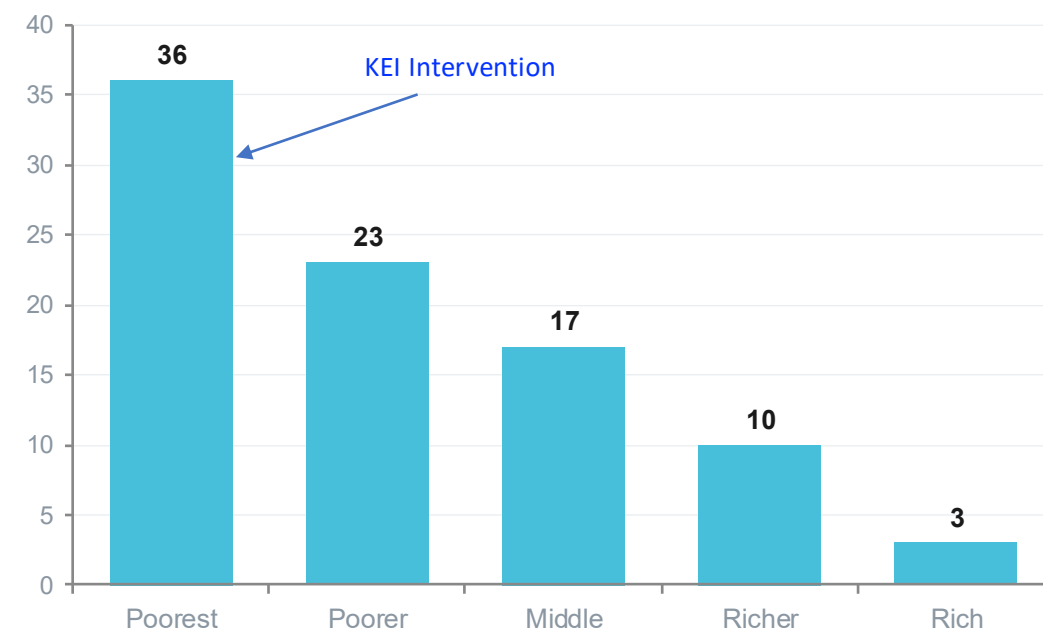

The Need in Kashmir

In a socially and economically challenged region, school dropout climbs steeply with age — and hits the poorest hardest. KEI enters at the high-school stage, for the most at-risk.

Out-of-school rate by age (%)

Out-of-school rate by income group (%)

The dropout rates accelerate after the age 14. And the hardest hit are the poorest. These are the “**bright but at-risk**” children.

The Need in Kashmir

- **Academic Performance:** Applicants must have secured at least 70% in their Grade 8 Term 1st results.
- **Financial Need:** The applicant's annual family income must not exceed INR 5 lakhs.
- **Highly Selective**
 - 3000+ Applicants/Year > 200 Selected Scholars

The dropout rates accelerate after the age 14. And the hardest hit are the poorest. These are the “**bright but at-risk**” children.

What Success Requires in the 21st Century

Academic merit alone is not enough. The decisive skills are the ones schools rarely teach.

Functional

- Language
- Math
- Science
- Technology
- Finance
- Civic & Cultural

Operational

- Problem Solving
- Critical Thinking
- Creativity
- Communication
- Collaboration

Character

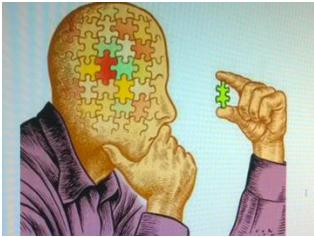

- Persistence / Grit
- Initiative
- Curiosity
- Leadership
- Adaptability
- Social Awareness

KEI's focus → Operational + Character: the competencies that turn students into leaders.

Our Model

We give **bright** but **at-risk** students a **system** that enables them to create **positive change**

Our Next Steps and Expansion

We got better at education, and it stopped being enough...

We are producing educated young people with no employment

We want to expand from producing unemployed graduates to youth with high economic agency

Young people who don't just hold a degree, but can convert Education into Income, independence, and the power to change their own lives

Our Next Chapter

We aspire to take KEI to a next chapter **Enabling Economic Agency**

01

From education to livelihood

A diploma or degrees no longer guarantees a job.
We aspire to build pathways to employability, skill-based trades, and selective entrepreneurship.

02

AI ready scholars

AI is foundationally changing the Education
We aspire to make our scholars AI ready and to deliver high-quality learning at scale, despite a fragile local system.

03

Scale the institution

Broaden and diversify the donor base, deepen alumni engagement, and professionalize operations to grow with confidence.

We value your perspective

- 1 What practical advice would you give a nonprofit at this kind of inflection point?
- 2 How do we scale organization the organization to meet this vision ?
- 3 How can you help us — programmatically, or strategically?

Thank You
